EXPERIENCE

Idle Solutions Pvt Ltd

Pune, India

Front End Developer Intern - Remote

Nov - Dec 2022

- Enhanced the consultant website's structure by streamlining HTML elements and optimizing image formats, leading to a 25% faster loading time.
- Implemented Responsive Design using CSS media queries, verified through browser compatibility testing across mobile, tablet, and desktop devices, enhancing user satisfaction by 15%.
- Boosted website performance by minifying JavaScript files (reducing size by 30%) and optimizing CSS rules, leading to a 20% increase in search engine visibility and faster load times.
- Increased user engagement by 20% by adding interactive JavaScript features, such as real-time content loading and tooltips, validated through user behavior analysis.

PROJECT

QuickCart E-Commerce App | Live | Source Code

- Tech Stack: React | Tailwind CSS | FakeStoreAPI
- Integrated FakeStoreAPI to enable real-time product data retrieval, ensuring accurate and up-to-date product listings for users.
- Added advanced categorization and filtering features, allowing users to browse products efficiently by category, price, and availability.
- Developed a shopping cart with functionality to add items, calculate total amounts seamlessly, and facilitate a streamlined checkout process.
- Designed a fully responsive layout with reusable components, ensuring consistent performance and an engaging user experience across all devices.

Della Resort App | Live | Source Code

- Tech Stack: HTML5, CSS3, SCSS, JavaScript, Bootstrap, FormSubmit
- Implemented secure login and registration to facilitate guest account management.
- Constructed a comprehensive room booking system with room details, pricing, and amenities for informed guest decisions.
- Built event-specific sections for weddings and conferences, providing detailed venue and service information.
- Integrated FormSubmit for secure and efficient form submissions on the testimonials, FAQs, and contact pages, streamlining guest inquiries and enhancing user interaction.

FilmFinder Movie App | Live | Source Code

- Tech Stack: React, Bootstrap, OMDB API
- Developed a movie app integrated with the OMDB API, providing real-time movie data and up-to-date information.
- Enabled personalized features for users to save and manage favorite movies with local data storage.
- Integrated a robust search function to provide quick access to a comprehensive movie database.
- Optimized performance and designed a mobile-friendly UI, ensuring fast loading times and seamless user interactions.

HONORS & INVOLVEMENT

- React Crash Course – Certificate from Udemy
- JavaScript Mastery Course – Certificate from Udemy
- Awarded 2nd Place in Startup Innovation Competition (College Fest) – Certificate
